

Cimply Style Guide

Writing sample — Cimply is a demonstration scheduling product for creative studios, built to showcase documentation skills. Not a live commercial product.

Quick reference for keeping Cimply documentation visually and terminologically consistent. Start new documents from Cimply_Template.dotx rather than rebuilding these settings by hand.

Logo

Available files:

- CimplyLogo wtext.png — full wordmark with tagline. Use on cover pages or standalone brand placements, not in running headers.
- CimplyLogosm no back.png — icon only, transparent background. Use in document headers and anywhere space is tight.

Usage rules:

- Don't recolor, stretch, or distort either file — use as provided.
- Keep clear space around the mark roughly equal to the height of the icon.
- Minimum display height: about 0.3 in (below that, the checkmark detail gets hard to read).

Color Palette

Swatch	Name	Hex	Usage
	Brand Purple	#451771	Document titles, primary logo mark
	Accent Purple	#732EB5	Section headings (Heading 1)
	Muted Gray	#666666	Disclaimers, italic secondary notes
	Body Black	#000000	Body text (default, not explicitly set)

Typography

All styles use Times New Roman.

- Title — 28pt, Brand Purple (#451771)
- Heading 1 — 16pt, Accent Purple (#732EB5)
- Body — 12pt, black (default; no explicit color override needed)
- Disclaimer / secondary notes — 12pt, italic, Muted Gray (#666666)

Terminology & Conventions

- Use “Designer,” not “Freelancer,” for the role that receives and completes orders — Designer is function-based and employment-status-agnostic, matching how “Scheduler” is named.
- Capitalize “Status” when referring to the field/label itself (e.g., “change the Status to Complete”).
- Use curly quotes (‘ ’ “ ”) and em dashes (—), not straight quotes or double hyphens.
- Every writing-sample doc opens with the italic gray disclaimer line shown at the top of this page, directly under the title.

Starting a New Document

Create new Cimplly docs from Cimplly_Template.dotx. It already has the Title and Heading 1 styles set to the correct brand colors and the logo placed in the header, so new documents inherit the branding automatically instead of it being redone by hand each time.
